Art Unit: 3782

DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1, 5, 6, 10, 13, 23-27 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Luberto (US 5725146 A) in view of Yocum (US 6027018 A).

Regarding claims 1, 13 and 23-25, Luberto teaches a container and blank for making including: a main panel (12) having a plurality of substantially straight edges about its periphery (14, 16, 18 and 20), each edge extending angularly from each of two adjoining edges (see Fig. 1); a plurality of side walls (32 and 46) depending from at least half of the edges of said main panel, said edges having side walls (see Fig. 4); a base panel (Luberto; 12) and a cover panel (Luberto; 105) one or more of said side wails having an outer wall panel (41) and an inner wall panel (43), said outer wall panel extending from a proximal fold or score line (14) along a remaining edge and said inner wall panel extending from a distal fold or score line (42) remote from the proximal fold or score line and along an opposed edge of said outer wall panel (see Fig. 4). The combination of the inner and outer side panels form a roll over wall of double thickness. Examiner notes that the top panel defined between lines 92 and 94 (horizontally), and lines 96 and 132 (vertically) is substantially the same shape as the bottom panel. Luberto also teaches a container wherein tabs (Luberto; 52 and 54) or the like are

Art Unit: 3782

provided on the lower surface or edge of the container (Luberto; see Fig. 2). Examiner considers these tabs to be capable of circulating air between the bottom of the container and the surface on which the container rests. Luberto lacks a removable portion from one of said sidewalls.

Yocum teaches a carton with integral promotional material wherein one or more of the walls further include one or more removable outer portions (138) that reveal promotional information on an inner panel (see Figures 1-24). Yocum teaches providing said removable portion(s) on a variety of differing containers and in a variety of locations. Therefore, it would have been obvious to one skilled in the art at the time of applicant's invention to provide the removable portion to any one of a finite number of six locations on Luberto's box that are capable of comprising a removable portion while still maintaining the integrity of the container (i.e. cover lid sides, cover lid front, base sides, or base front wall); and it would have been obvious to one of ordinary skill to select the base side walls. The inclusion of such promotional features on the outer wall panel of Luberto's pizza box would make the box more attractive to the consumer (Yocum; Col 1 lines 25-29).

Regarding claim 5, Luberto, as modified above, teaches a container in which the removable portion (Yocum; 138) or portions are arranged with a perforation line (Yocum; 136) or line of weakness to facilitate removal from the remaining wall portion and inner wall panel and the remaining outer wall portion together with the inner wall panel, which is left intact after removal of the removable portion (as explained in the rejection of claims 1 and 4 above), retain sufficient structural integrity that the container

Art Unit: 3782

remains stackable (Luberto; Col 4 lines 5-15) and performing its function in retaining the heat and/or freshness of its contents when enclosed therein.

Regarding claims 6 and 27, Luberto, as modified above, teaches a container wherein the removable portion includes a slit, or cut providing a tab (Yocum; 132) to facilitate easy removal of the coupon from the outer wall panel. It would have been obvious to one of ordinary skill in the art at the time of applicant's invention to further modify Luberto's container to include a slit providing a tab on the removable coupon portion so that the removal of said coupon is more easily facilitated as taught by Yocum.

Regarding claims 10 and 31, Luberto, as modified above, teaches a container wherein the sidewalls are at equal angles to each adjoining sidewall (Luberto; Fig. 2 shows side wall meeting at right angles to one another) and the side walls have substantially parallel edges such that the main panels are close to a substantially parallel spaced apart disposition, there being three side walls which together with the joining panel (Luberto; 76) constitute a four-sided carton forming a square or rectangular prism and the side walls and joining panel have dimensions selected for the packaging of pizza style pies (Luberto; Fig. 1), and may include ventilation holes (Luberto; Col 2 lines 25-27), corner reinforcing tabs (Luberto; 68, 70, 80 and 82), simple single-paneled side walls (Luberto; 60) on the main panel not having the roll-over walls and such like as desired.

Regarding claim 26, Luberto, as modified above, teaches a container with double wall thickness (Luberto; inner wall panel 43 and outer wall panel 41) wherein only one panel has a removable section for a consumer coupon (Yocum; 138), leaving an intact

Art Unit: 3782

inner wall panel and structurally sound box. It would have been obvious to one skilled in the art at the time of applicant's invention to place said removable coupons on the outer side panel rather the inner side panel so that the promotional material would be viewable to the consumer (Yocum; Fig. 21).

3. Claims 11 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Luberto in view of Yocum as applied to claims 1 and 23 above, and further in view of Uffmann (US 6153280 A).

Regarding claims 11 and 32, Luberto, as modified above, teaches everything except a removable portion with magnetic material to permit the removable portion to be temporarily attached to a metallic surface. Uffmann, however, teaches a magnetic card with perforations (58) that allow the panel (54) to be attached to a metallic surface via magnet (56). Therefore, it would have been obvious to one skilled in the art at the time of applicant's invention to further modify Luberto's pizza box to include magnetic strips on the removable coupons so that the coupons could be placed on a refrigerator (Uffmann; Col 1 lines 14-17).

Response to Arguments

4. Applicant's arguments filed 1/21/2010 have been fully considered but they are not persuasive. Applicant argues that the prior art lacks the elevating tabs as claimed. Applicant notes that the elevating tabs of the prior art extend only "slightly" below the lower surface of the bottom panel, therefore no suggestion or evidence exists that the "slight" extension is sufficient to allow airflow beneath said bottom panel.

Examiner respectfully disagrees with the contention that no air flow exists below the bottom panel due to only a "slight" extension of bottom extending tabs. Examiner notes that air is molecular; therefore even "slight" elevations would allow air molecules to pass.

Conclusion

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CHRISTOPHER DEMEREE whose telephone number is (571)270-1982. The examiner can normally be reached on Mon-Fri, 8:00 AM-5:00PM, Alt Fri, EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan Newhouse can be reached on (571) 272-4544. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
